

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Original): An information processing apparatus for dealing with moving pictures, comprising:

storing means for storing still pictures corresponding to scene switchovers of said moving pictures, and time stamps of said scene switchovers; and

display controlling means for providing display control in such a manner as to display, given a reference position on a screen, said still pictures in positions at distances from said reference position, said distances reflecting differences between a time stamp corresponding to said reference position on the one hand and said time stamps of said scene switchovers on the other hand.

Claim 2 (Original): An information processing apparatus according to claim 1, wherein said display controlling means provides display control in such a manner that the time stamp of a moving picture being reproduced by reproducing means corresponds to said reference position.

Claim 3 (Original): An information processing apparatus according to claim 1, wherein said display controlling means provides display control in such a manner as to shift continuously the positions of said still pictures in accordance with the time stamp of a moving picture being reproduced by reproducing means.

Claim 4 (Original): An information processing apparatus according to claim 1, wherein said display controlling means provides display control in such a manner as to

display indications resembling sprocket perforations of a movie film in the vicinity of said still pictures.

Claim 5 (Original): An information processing apparatus according to claim 1, wherein said display controlling means provides display control in such a manner as to display a reference position on said screen on a fixed and highlighted manner.

Claim 6 (Original): An information processing method for use with an information processing apparatus for dealing with moving pictures, the method comprising the steps of:

storing still pictures corresponding to scene switchovers of said moving pictures, and time stamps of said scene switchovers; and

providing display control in such a manner as to display, given a reference position on a screen, said still pictures in positions at distances from said reference position, said distances reflecting differences between a time stamp corresponding to said reference position on the one hand and said time stamps of said scene switchovers on the other hand.

Claim 7 (Currently Amended): A disc medium for causing an information processing apparatus ~~for dealing to deal~~ with moving pictures to execute a program comprising the steps of:

storing still pictures corresponding to scene switchovers of said moving pictures, and times stamps of said scene switchovers; and

providing display control in such a manner as to display, given a reference position on a screen, said still pictures in positions at distances from said reference position, said distances reflecting differences between a time stamp corresponding to said reference position on the one hand and said time stamps of said scene switchovers on the other hand.
